Machine Learning and AI

The work is innovative. The experience is magic.

The people working in machine learning and AI at Apple are building amazing experiences into every Apple product, allowing millions to do what they never imagined. Because Apple fully integrates hardware and software across every device, these researchers and engineers collaborate more effectively to improve the user experience while protecting user data. Come make an impact with the products you create and the research you publish.

Find a team and begin your own story here.

- Deep Learning and Reinforcement Learning
- Computer Vision
- Machine Learning Infrastructure
- Applied Research
- Natural Language Processing and Speech Technologies
- Search and Informational Retrieval

Our teams are located in Santa Clara Valley, Seattle, Pittsburgh, Boston, Portland, Beijing, Cambridge (UK), Cheltenham, Herzliya, Paris, Heidelberg, Linköping, Stockholm, Zurich, Munich, and Singapore.

If you're interested, we encourage you to apply:

Full-time
