

Some screenshots of the DART app.

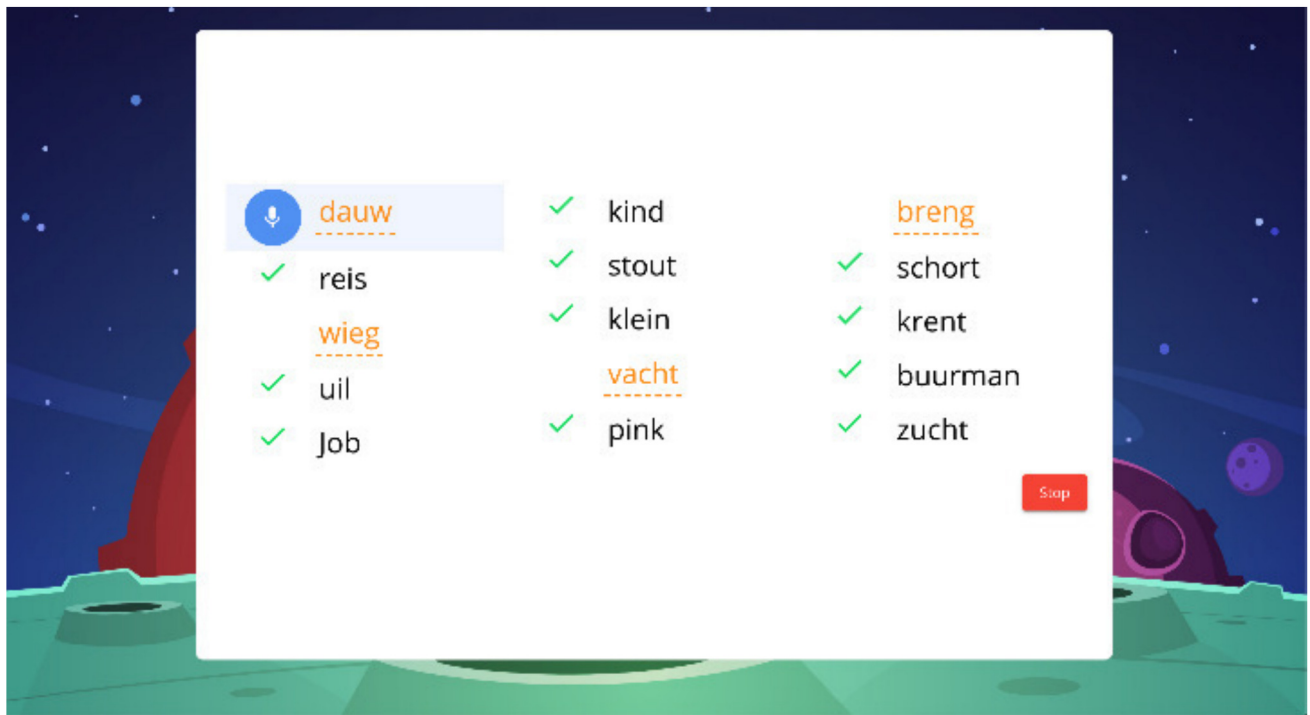

Figure 3: A child has spoken all the words presented on the screen, and has received feedback. Some words are correct, some are incorrect and coloured orange. The child can now attempt again; after clicking on the blue microphone the child can pronounce the words again.

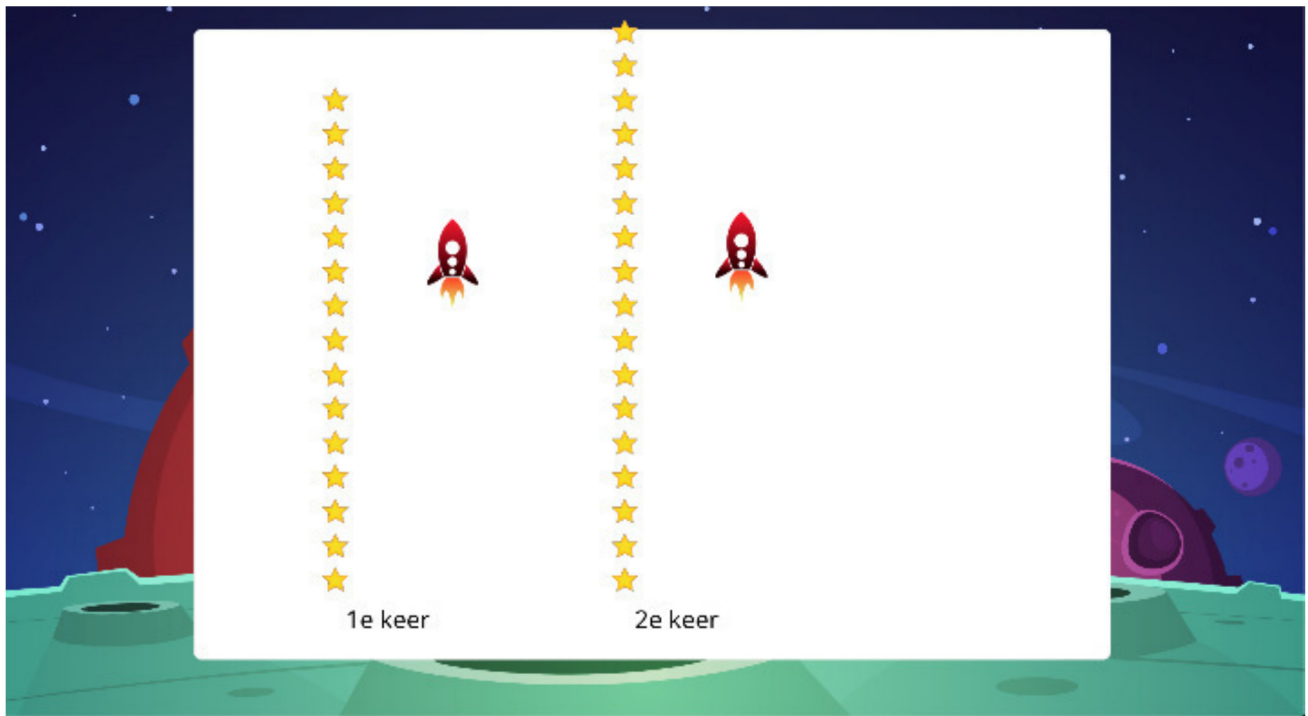

Figure 4: After a series of exercises have been completed the child gets feedback on her/his overall performance, after the first attempt ('1e keer'), and the second attempt ('2e keer').
